Subject: Teacher Appraisal Instrument

Dear Friends on the new Teacher Appraisal Instrument,
In the spirit of the standards, the environment, and the current century, I am modeling the digital behavior that we expect of teachers and have created an e-portfolio. It is in this virtual location that I will save, collect and retrieve artifacts as documentation for each standard. I used a free web-based tool at www.weebly.com and I used www.wordle.net to create the main header. Feel free to right click and save any of the "Artifacts may be" headers under each standard if you choose to use this a template. I have not added any links or documents yet, but will be in the coming days. I realize this digital option may not work for everybody, and I'm happy to teach anyone that wants to learn.
